

**Absolute
Translations**

We make you look good

About us

Who we are

We are Absolute Translations, a bunch of experienced and motivated professionals who help you cross boundaries, open doors, and – why not – even conquer the world.

How? With tailored advice, a passion for languages and a broad cultural knowledge.

We're boutique, flexible and creative, and we have an amazing track record in delivering quality work.

We tackle even the largest of jobs thanks to the technology we use and our translation teams worldwide.

How we work

We love technology! We work with memoQ Adriatic, an enterprise translation management system that gives us the edge we need to compete in this highly competitive market.

memoQ Adriatic runs on a dedicated server and speeds up translation by allowing multiple translators and reviewers to work on projects simultaneously.

It also integrates a Customer Portal where you can manage your translation requests, approve quotes, track the status of a translation and download files when complete.

What we do

We work in specialised technical, legal and corporate translation, artistic transcreation and audiovisual production for a wide range of sectors and services.

If you are in TV/radio, marketing/advertising, IT/software development, science/biotech, engineering or the agribusiness, read on. We have what you need.

For live events, like a meeting with your guests from China, we offer interpreting services in almost any language. Our team abroad can also assist you during trade missions, conferences or any other type of event.

Who you will work with

Experienced and motivated professionals!

We handpick our linguists based on native language, qualifications and specialty fields and we assign them to our clients based on expertise and corporate needs. You will work with a team of professionals that will be 'your' dedicated team.

What our clients value the most from working with Absolute Translations is that we offer them 'peace of mind'. We have a peer review system in place that monitors and controls, and that ultimately ensures the highest quality.

“You can relax and
get on with your
work, while we do
the heavy lifting.”

“Our aim is for your communication to score, regardless of the language.”

Our services

Text translation

We specialise in audio/video, creative, technical, legal and corporate and translate into 250+ languages and dialects.

You will work with a team of specialised translators, seasoned linguists and industry experts native to the country or community you are targeting, who will be your translation team.

Audio/video translation

Voice-over recording, voice talent casting, script adaptation, time-coding or subtitling, you will work with the best in the industry.

Our native voice talents are professional artists with many years' experience in areas ranging from video games, corporate presentation videos and e-learning videos to documentaries and commercials.

Multilingual publication

From technical manuals to fantastic fiction, we translate your artwork in-template and deliver print-ready artwork in 250+ languages.

Our desktop publishing team works in Roman, complex script and right to left languages and our native translation teams look after all the QA and post production checks.

Website localisation

Localisation means adapting content to a new target market. This may or may not involve translation as you can also localise between two variants of the same language.

Internet users will naturally feel more comfortable if the information is presented in their native language. By localising your website you will tap into a whole new market.

Transcreation

Translating catchy phrases, puns, imagery and cultural connotations is only possible by recreating the meaning and the effect of the pun, not by translating it.

A witty punchy tagline may well be witty and punchy in English, but if the meaning is lost in translation, all that's left is a confusing phrase. This is where transcreation comes into play.

Conference interpreting

Interpreting or oral translation is a skill that few linguists master. A skilled interpreter has many years of training under their belt and will specialise in a select number of fields only.

Our conference interpreters are NAATI accredited at the senior and advanced levels and are members of AIIC, the international conference interpreter association.

memoQ Adriatic

memoQ Adriatic is an enterprise translation management system that offers:

- Server access and storage
- Quality assurance
- Terminology management
- Customer portal
- Automation and control

“It gives us an edge when it comes to quality assurance and translation speed.”

Server access and storage

The server is a repository for translation assets and a hub for collaborative translation projects. It allows us, you and our translation teams to collaborate on translation projects in real-time and use the translation assets stored.

Quality assurance

Translation assets can be translation memories, termbases, reference materials and more. Translators can share these assets with each other and communicate with project managers and customers through a discussion forum. This adds an extra layer of quality monitoring and control.

Terminology management

Terminology management is important because it allows you to keep your brand message consistent in all the languages you localise in. It allows you to offer your target markets a local brand experience while keeping core corporate messages consistent across your markets.

Customer portal

memoQ Adriatic also comprises a Customer Portal where you can manage your translation projects with Absolute Translations. You can upload documents for translation, request quotes, accept quotes, start jobs, track the status of translation projects and download translations that are ready.

Happy clients

The feedback from our Chinese testers was that it was the best translation amongst three. The translation demonstrated a good understanding of geological terms and overall content. Loyal to the English original, with good sentence flow. I will be recommending you for the next publication and any other products requiring Chinese translation.

Chantelle, *Geoscience Australia*

My Chinese colleague told me that your translation was superior to the other company we have been using. So some good feedback for you!

Skye, *Tax, Oil & Gas, China – Ernst & Young*

Our manager was impressed by the professionalism and level of service offered by two of your interpreters at the 2013 APREC conference in the Gold Coast and we are now looking for interpreters for upcoming meetings in Qatar. My colleague Jenna, from BDO Brisbane, has very kindly forwarded me your contact details.

Stephanie, *BDO – Brussels Worldwide Services*

I received feedback from our French speakers in Guinea who said that the French on the web is excellent, so thank you very much for the high quality translation.

Suzie, *Guinea Alumina Corporation*
